Personal Statement

I just completed pursuing a degree in Information Sciences from Moi University with specialization in IT.

I am passionate about the career path I have chosen and would really wish to make it a big part of my life.

I am a good listener, a good communicator and a down to earth fellow. I have participated in various activities within the University and outside one being playing rugby.

Am a regular visitor at the gym with keeping fit and maintaining a positive mindset being the aim?

I would really wish to develop my portfolio and make great strides in the field of Information technology.
